

# SCT-T24

## Split-Core Current Transformer

for low-cost, high accuracy contactless current sensing

### Description

The SCT-T24 is a split core current transformer (CT) that enables low-cost and high accuracy current sensing.

Typical applications include contactless current measurement up to 300 Amps at line frequencies of 50 Hz or 60 Hz. Furthermore the split core design allows easy and safe “clamp-on” installation without breaking the power line.

### Characteristics

Parameter	Typical Value	Unit
Primary current range	300	A
Output voltage	0.333	V
Accuracy	1	%
Operation temperature	-20...+55	°C
Operation frequency	50/60	Hz
Insulation	3	kV

### Geometry

### Model Order Code: SCT-T24

Model \ Dimensions	L	W	H	a	e	d	g
SCT-T24	34	51	67	24	24	1000	6

(all dimensions: mm)
